

Wellcome Global Monitor 2026

Australia and New Zealand factsheet

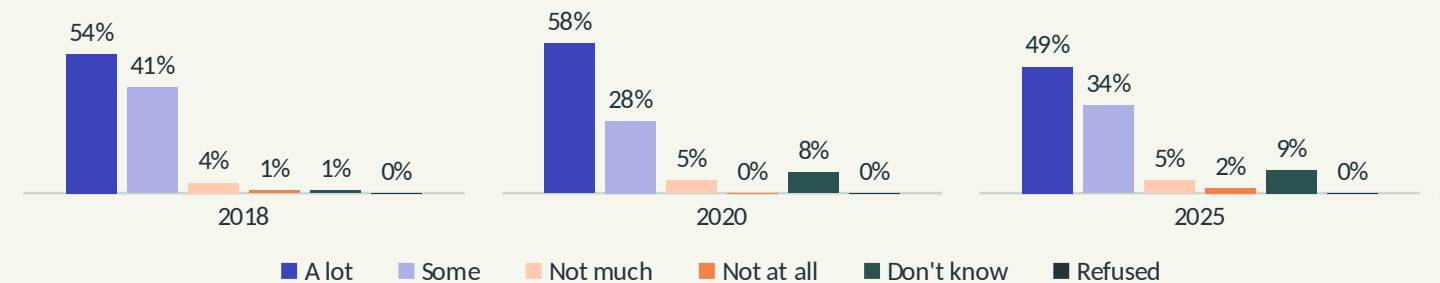

Key Wellcome Global Monitor 2026 Results

The Wellcome Global Monitor is the world's largest study of public trust in science. We survey adults in 140 countries to understand how people think and feel about science and health. Below are key findings for Australia and New Zealand from 2025. For the full report and more factsheets visit [Wellcome.org](https://www.wellcome.org).

Trust in science: Trend over time

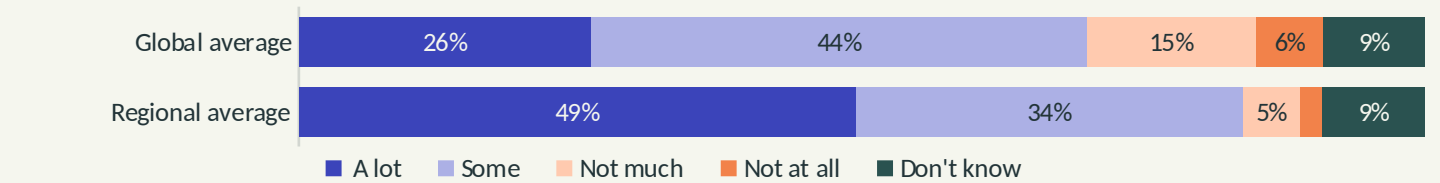

Q: In general, would you say that you trust science a lot, some, not much, or not at all?

Source: Wellcome Global Monitor 2026 | Base: Representative sample of adults aged 15 or older in Australia and New Zealand across 2018, 2020 and 2025 (n = 2,005, 2,001 and 2,000 respectively)

Source: Wellcome Global Monitor 2026 | Base: All respondents who use the internet or an app to find health information n = 1,824 adults aged 15 or older in Australia and New Zealand, 2025

Wellcome Trust has worked with two partners, Gallup and Ipsos, to deliver the Wellcome Global Monitor 2026. Gallup was responsible for the survey design and data collection, and Ipsos was responsible for the data analysis and reporting of the Wellcome Global Monitor 2026.

Data is weighted by the aged 15+ population size of the countries included in the analysis. For readability, labels for values below 3% are omitted where space is limited.
